

I am Janine Fritz, currently perusing a National Diploma in Civil Engineering at Cape Peninsula University of Technology in Bellville. I am completing my practical training with Moses Civils, who has been generous enough to mentor me during this time period. The reason why I love working for them is that I am afforded hands-on training with the construction side of the project, as well as, the development of my soft skills that are needed on site. Due to the fact that the company is relatively small, I am exposed to many aspects in the construction process which are essential, such as; project *management, construction and survey*. For the three months that I have worked with them, I have learned how to build *gravel roads* and *armour-flex roads, manholes, bond reinforcements* and *many other structures*. I am looking forward to completing my training with them and hopefully, when I graduate, work for them, full-time.
